

Hawaii FY14 End-of-Year Agenda
WQS, Monitoring, Integrated Report, and TMDLs
January 27, 2015

1. Next set of WQS amendments
2. National Surveys
 - a. Plans for 2015 reef flat survey
 - Scope (all islands, four main islands, or nested design)
 - Sample collection time period
 - Desk top site assessment
 - Equipment (boat, PAR meter)
 - Additional parameters?
 - Sample shipment (cooling nutrient samples)
 - Report (Hawaii only and Hawaii data combined with three Pacific Island Territories)

Parameters sampled by Territories in 2010 reef flat survey: temperature, pH, DO, salinity, turbidity, depth, light attenuation, chlorophyll *a*, dissolved nutrients (ortho-phosphate, nitrite, nitrate, and ammonia), total phosphorus, total nitrogen, total suspended solids, enterococci, and bioassessment of floral and faunal composition of the reef flat habitats

- b. Participation in 2016 wetlands survey?
3. Data entry in WQX/STORET
 - Ensure all data are flowing to WQX/STORET
4. Plans for QAPP revisions
 - Complete stream sampling QAPP
 - Update decision rule for beach monitoring to include new bacteria criteria
5. Integrated Report Timing
6. TMDL Vision
